INDEX

Volume 15: 1950-1951

ADDRESS(ES): aims and ends of predental program, 51

Agnew, R. G.: local and systemic aspects of diagnostic teaching in dentistry, 174

Aids: teaching; use of plastics in making models, 192

Albertson, G. L.: See Gwinn, C. D.

Anatomy: planning forces in teaching, 34

Appleton, J. L. T.: letter to deans (editorial), 130

Arnold, F. A., Jr., and Zander, H. A.: research in dentistry for children, 236

Ashton, J. W.: address; aims and ends of predental program, 51

BASIC SCIENCES: teaching in dentistry for children, 184; *see also*, sciences, basic

Blauch, L. E.: teaching dentistry for children, introduction, 222

Book Announcements: 44, 124, 203, 272

Brauer, J. C.: development of pattern of instruction, 241

Breese, L. E., et al.: teaching endodontia, symposium, 60-79

Bridge and Crown: prosthesis, objectives in preclinical teaching, 11-25; teaching preclinical, 80-96

Brown, D. W.: See Breese, L. E. et al.

CHEMISTRY: high school, study of effects on oral hygiene grades, 8

Cleveland, J. L., Jr.: See Sturdevant, R. E. et al.

College News: 40, 121, 200, 270

Crown and Bridge: prosthesis, objectives in preclinical teaching, 11-25; teaching preclinical, 80-96

DENTAL EDUCATION: council of (photo), 199

Dental School(s): enrollment (editorial), 130

Dentistry: autonomy in, 210; for children, a complete study of the teaching program, 222-269; teaching, 25-33; why, 209; history of, 209; on teaching for children (editorial), 209; philosophy of, 211

Diagnosis: oral (editorial), 7; teaching, local and systemic aspects, 174

Dressel, R. P.: See Leander, C. T. et al.

EASLICK, K. A.: dentistry for children, a recommended undergraduate program, 259; present study of the program, 222

Editorial(s): dental roentgenology, medical diagnosis, 5; my students hate me, 129; on teaching dentistry for children, 209; oral diagnosis, 7

Education: dental, change in aims due to teaching periodontology, 109; council of (photo), 199

Endocrine (Glands): influence on etiology of oral lesions, 164

Endodontia: teaching, part of operative dentistry, 60; part of oral pathology, 73

FOCI: ORAL: See oral foci, etc., 160

Freeman, C. W.: teaching oral surgery, correlation with basic sciences, 144

Fulton, John T.: public interest in expansion of oral health care for children, 223

GILL, J. R.: See Sturdevant, R. E., et al.

Glands: influence on etiology of mouth lesions, adrenal, 167; gonads, 167; other hormones, 173; pancreas, 169; pituitary, 166; thyroid, 172

Glickman, I.: change in aims of dental education, 109

Grimm, D. H.: See Gwinn, C. D.

Gwinn, C. D. et al.: a technic for making teaching models for use in oral surgery, 213

HABERMAN, S.: application of bacteriological and pathological laboratories, 147

Hunt, Josephine P.: the library corner, 42

Hygiene: oral, study of effects of high school chemistry on grades, 8

INDEX: vol. 15, 277

Infection: oral foci, new concepts of, 160

Ireland, R. L.: a survey, 252

KESEL, R. G.: See Breese, L. E. et al.

Knutson, J. W.: oral health needs, including personnel facilities and plans, 231

Kolmer, J. A.: teaching internal medicine at Temple University, 132

LABORATORY(S): approach, in teaching, 154; bacteriological and pathological, 147

Leander, C. T., et al.: teaching preclinical crown and bridge, 80-96

Leonard, H. J.: status of periodontology in undergraduate curriculum, 97

Library: the corner, 42

MARTIN, Ruth E.: content of teaching program, 246. *See*, also, Wilbur, H. M., et al.

Medicine: teaching internal, Temple University, 132

Miller, S. C.: laboratory approach in teaching and diagnosis, value of, 154; students hate me (editorial), 129

NUCKOLLS, Jas.: endocrine influence on etiology of oral lesions, 164

Newlin, Jean E.: study of effects of high school chemistry on oral hygiene grades, 8

Nuttall, E. B.: *See* Sturdevant, R. E., et al.

OBITUARY(IES): 123

Operative Dentistry: includes teaching of endodontia, 60

Oral Surgery: models for technic teaching, 213; correlation of basic sciences with clinical practice, 144

PATHOLOGY: oral, includes teaching of endodontia, 73

Pettit, L. S.: *See* Wilbur, H. M., et al.

Periodontia: teaching of, 97-120

Periodontology: change in aims of dental education, 109; status in undergraduate curriculum, 97

Plastic(s): materials, in making teaching aids in denture prosthesis, 192

Prosthesis: crown and bridge, objectives in preclinical teachings, 11-25; teaching preclinical phase, 80-96; denture, use of plastic materials in making teaching aids, 192

RABINOVITCH, B. Z.: basic sciences, teaching dentistry for children, 184

Roentgenology: dental, in medical diagnosis (editorial), 5

SCHOOL: dental, enrollment (editorial), 130

Science(s): basic, correlation with clinical practice in teaching, 144; in teaching dentistry for children, 184

Smith, R. V.: *See* Sturdevant, R. E., et al.

Stafne, E. C.: editorial, dental roentgenology in medical diagnosis, 5

Starr, F. C.: *See* Leander, C. T., et al.

Sturdevant, R. E., et al.: conference session, crown and bridge prosthesis, objectives in preclinical teaching, 11-25

Surgery: oral; *See* oral surgery.

TEACH(ER)(ING): anatomy, planning forces in, 34; dentistry for children, introduction, 222; a recommended undergraduate program, 259; a survey, 252; basic sciences, 184; content of teaching program, 246; dental technics, 132; development of pattern of instruction, 241; oral health needs including personnel facilities and plans, 231; panel discussion, 25-33; public interest in expansion of oral health care, 223; relationship to instruction in other fields, 255; research in, 236; the present study of program, 222; endodontia, a symposium, 60-79; internal medicine, Temple University, 132; oral diagnosis, application of bacteriological and pathological laboratories, 147; local and systemic aspects of diagnosis, 174; new concepts of oral infection, 160; values in laboratory approach, 154; oral surgery, correlation of basic sciences with clinical practice, 144; periodontia, 97-120; preclinical, crown and bridge, prosthesis, 80-96; objectives in crown and bridge prosthesis, 11-25; technic models in oral surgery, 213; use of plastic materials in making teaching aids for denture prosthesis, 192

Teuscher, G. W.: dental technics, teaching dentistry for children, 182

Technics: dental, teaching dentistry for children, 182

Thomas, B. O. A.: *See* Breese, L. E., et al.

WEISENGREEN, H. H., and Wiswell, O. B.: planning forces in teaching anatomy, 34

Wilbur, H. M., et al.: panel discussion, dentistry for children, 25-33; relationship of instruction in dentistry for children to instruction in other fields of dental service, 255

Wiswell, O. B.: *See* Weisengreen, H. H., and Wiswell, O. B.

Wolfe, W. R., Jr.: *See* Wilbur, H. M., et al.

YORK, D. H.: *See* Leander, C. T., et al.

ZANDER, H. A.: *See* Arnold, F. A., and Zander, H. A.
